

Andoni Aguirre Aranguren

Software and Integration Engineer | Master's in Teacher Training

León, Castilla y León, Spain | aagirre92@gmail.com | LinkedIn | 664242615

About Me

Well, in these times where a CV can be quickly made through AI, I'm going to try to describe in my own words who I am and what I can contribute to teaching.

I have been working as an automation engineer (that is, a person who uses programming and automation tools in the most efficient way possible to solve a problem or highly repetitive and manual process) since 2021. I made my first attempt at this in 2017 at Deloitte, and it was something I quite enjoyed (it was my first job).

Since then, I have done several things (I worked as an electronics designer, I was in Rome working as an economic and commercial advisor with the BEINT scholarships from the Basque Government, I learned to program web applications, and finally I resumed my career as an automation engineer/programmer).

The latter led me to pursue a master's degree in teacher training at UNIR (note to the reader: this master's degree costs a lot of money, I wouldn't have done it if I didn't have a certain vocation or determination to be a teacher) while working at the same time.

Although I have done several things, they have all had a common denominator: **adding value and feeling useful**. Specifically, I feel very happy and fulfilled when I have had to explain or train others. I use active learning methodology with students (that is, making it as practical as possible) especially through challenges, without this entailing a detriment to the theoretical foundations of the subject (although this is sometimes utopian, especially when time is limited).

For the rest of this CV, I used the AI tool *gemini* to help me summarize my professional experience (I used the information available in my LinkedIn profile as a basis, which I keep completely up to date).

Professional Experience (Technical and Training Focus)

Senior Software Engineer & Technical Mentor | EPAM Systems

January 2022 - Present (4 years 5 months) | Málaga, Andalusia, Spain | Remote

- **Mentoring and Technical Training:** Responsible for training and continuous development of teams in technologies such as Microsoft Graph, Azure Logic Apps, Power Automate and databases.
- **Technical Leadership and Communication:** Acting as a bridge between client needs and the development team, facilitating the understanding of complex technical requirements to non-technical profiles.
- **Development and Integration:** Design and development of end-to-end cloud integrations in Azure Functions (Python) and complex corporate automations.
- **Migration and Optimization:** Leadership in RPA to cloud migration projects (SaaS), ensuring regulatory compliance (GDPR) and cost efficiency.

Automation Engineer and RPA Trainer | Roboyo

January 2021 - December 2021 (1 year) | Barcelona, Catalonia, Spain | Remote

- **Training and Creation of Educational Content:** Preparation of educational material and execution of training sessions (internal and for external companies) on Automation Anywhere, covering everything from RPA programming to system architecture and administration.
- **Consulting and Infrastructure:** Comprehensive advice to clients for configuring infrastructures capable of running software robots.
- **Data Analysis:** Connecting Power BI to multiple sources to generate executive dashboards (Power Query/M).
- **Full-Stack Development and APIs:** Creation of educational and operational web applications with Flask (Python) and educational collections in Postman for REST API usage.

International Trade Advisor | Economic and Commercial Office of the Spanish Embassy

January 2020 - December 2020 (1 year) | Rome, Italy (Coverage: Albania, Malta, San Marino)

- *Internationalization scholarship from the Basque Government (BEINT).*
- **Data Analysis and Synthesis:** Use of Python (Jupyter Notebooks) and Excel (VBA, Macros, Pivot Tables) to prepare informational and technical reports on the impact of COVID-19 on trade.
- **Intercultural Communication:** Development of communication and synthesis skills in an international diplomatic and commercial environment, key for teaching in diverse settings.

Web Application Developer | Bullhost Cloud Services

June 2019 - July 2019 (2 months) | Bilbao, Spain

- Practical application of knowledge following an intensive 510-hour course.

- **Web Development (Frontend/Backend):** Creation of platforms with HTML5, CSS3, JavaScript, PHP, SQL and WordPress.

Electronics Designer | Mondragon Assembly

June 2018 - December 2018 (7 months) | Aretxabaleta

- Programming of industrial PLCs (Siemens, OMRON, Beckhoff) and development of office automation tools (Excel Macros) to automate the generation of engineering files.

Junior Technical Consultant (RPA) | Deloitte

October 2017 - April 2018 (7 months) | Bilbao, Spain

- Analysis and development of robotic business processes. First contact with key industry tools (UiPath, Blueprism, C#).

Education and Pedagogical Training

- **Master's Degree in Teacher Training (Specialization in Technology/Computer Science)** | UNIR (October 2023 - July 2024)
- **Postgraduate Degree in International Trade (BEINT Scholarship)** | University of the Basque Country / EHU (September 2019 - December 2020)
- **Master's Degree in Industrial Engineering** | UPV/EHU (2015 - 2017)
- **Laurea Magistrale in Engineering (Electrical, Automation, Computer Science)** | Università degli Studi di Cagliari (2016 - 2017)
- **Bachelor's Degree in Industrial Engineering** | UPV/EHU (2010 - 2015)

I am currently pursuing a **Bachelor's Degree in Computer Science** through *UNED*

Languages

- **English:** C1 Level (Cambridge: Advanced - CAE). Ability to deliver technical training in English.
- **Basque:** Native / Bilingual (EGA).
- **Italian:** Professional proficiency.
- **Spanish:** Native.
