

Andoni Aguirre Aranguren

Cloud & Automation Engineer · Azure · GCP · Python · RPA · 8+ years of experience

León, Spain · +34 664 242 615 · aagirre92@gmail.com · linkedin.com/in/aaguirrearanguren · github.com/aagirre92

Introduction

Automation engineer with over 8 years of experience in process analysis and automation, systems integration, and RPA (Robotic Process Automation).

I have worked on production projects for multinational clients in the healthcare, pharmaceutical, retail, and manufacturing sectors, designing end-to-end solutions with Azure, Python, and Power Automate that connect platforms such as SAP ERP, Workday, Snowflake, and Jira (among others).

My focus is on transforming complex business processes into scalable, low-maintenance solutions with measurable operational impact.

Professional Experience

Senior Software Engineer · EPAM Systems Spain

January 2022 – Present · Madrid (remote)

European retail client — CRO Reporting Automation

- Designed and implemented a Python reporting pipeline that automatically generates PowerPoint presentations from Jira data, using Azure Functions and Azure Blob Storage as cloud infrastructure; integrated with Atlassian REST APIs with error handling, retries, and pagination.
- Automated report publishing to Confluence using the Atlassian API and Power Automate Cloud as an orchestrator, reducing weekly reporting time from hours to minutes.

European pharmaceutical client — RPA Cloud Migration

- Led the migration of Automation Anywhere A360 from on-premise to SaaS, coordinating technical, security, and compliance (GDPR) aspects.
- Optimized costs by migrating processes from Automation Anywhere to the Microsoft Power Automate ecosystem (Cloud and Desktop), reducing licensing costs and simplifying maintenance.
- Created automations for SAP ERP using RPA tools and Python.

Other projects at EPAM

- End-to-end cloud integrations in Azure Functions (Python) between corporate systems (ServiceChannel–Workday), featuring OAuth 2.0 authentication and Azure AD App Registrations, data extraction with generative AI (Azure AI Foundry), validation, SFTP automation,

and significant reduction of manual work; triggered from Power Automate Cloud with throttling and retry management.

- Python automations for SAP, synchronization with Snowflake and SQL Server, and regulatory data processing, deployed in cloud environments and virtual machines.
 - Automation consulting: identifying opportunities and selecting the most suitable technology for each use case.
 - Technical mentoring to teams on Microsoft Graph, Azure Logic Apps, Power Automate, and databases.
-

Automation Engineer · Roboyo

January 2021 – December 2021 · Barcelona (Remote)

- Installed, updated, and maintained Automation Anywhere A360 software (Control Room and IQ Bot) on Windows Server.
 - Advised on and configured client infrastructure for running robots with Automation Anywhere A360.
 - Created RPA bots with Automation Anywhere A360 and Power Automate to automate operational tasks.
 - Developed web applications with Flask (Python) leveraging the Automation Anywhere REST API.
 - Integrated Power BI with multiple data sources (including Bot Insights) to generate dashboards on executions and business data.
 - Prepared and delivered internal and client training on Automation Anywhere: RPA programming, product architecture, and administration.
-

International Trade Advisor · Oficina Económica y Comercial de la Embajada de España en Roma

September 2019 – December 2020 · Bilbao and Rome

BEINT internationalization scholarship from the Basque Government.

- Developed Python scripts in Jupyter Notebook for data analysis and visualization of the COVID situation in Italy.
 - Automated international trade reports using Excel (VBA, pivot tables).
 - Published technical reports: *The State of Blockchain Technology in Italy* and *e-Country Report: E-commerce in Italy 2020*.
-

Electronic Design Engineer · Mondragon Assembly

June 2018 – December 2018 · Aretxabaleta

- Programmed Siemens, OMRON, and Beckhoff PLCs for industrial assembly lines.
 - Developed Excel macros (VBA) for the complete automation of alarm and message file generation for Siemens and OMRON PLCs.
 - Worked with industrial communication protocols: EthernetIP, EtherCAT, Profibus.
 - Official Beckhoff certifications: TwinCAT 3 NC PTP and TwinCAT 3 PLC.
-

Junior Technical Consultant · Deloitte

October 2017 – April 2018 · Bilbao

- Developed and analyzed business process automation (RPA) using UiPath and Blue Prism.

Junior Electrical Engineer · ZIV Aplicaciones y Tecnología

November 2015 – August 2016 · Bilbao

Internship in collaboration with UPV/EHU.

- Automated testing of an intelligent protection relay (IED protection relay, model IRV-M) using OMICRON Test Universe.

Technologies and Tools

Area	Technologies
Cloud	Microsoft Azure · Google Cloud Platform · Azure Functions · Azure Blob Storage · Azure API Management · Azure AI Foundry
Automation / RPA	Power Automate Cloud · Power Automate Desktop · Automation Anywhere A360 · UiPath · Blue Prism
Development	Python · REST APIs (OAuth 2.0, retries, pagination, throttling) · SOAP · Flask · JavaScript · jQuery · VBA
Data	SQL · SQL Server · Snowflake · Azure Storage · Power BI · Power Query (M) · SharePoint
Integration	SAP · Workday · ServiceChannel · Microsoft Graph API · Atlassian Suite (Jira, Confluence) · Azure AD / Entra ID (App Registrations, Service Principals)
DevOps / Other	Git · Azure DevOps · Jupyter · VS Code · Windows Server · Linux (Debian)

Certifications

Certification	Organization
AZ-900 Microsoft Azure Fundamentals	Microsoft
Associate Cloud Engineer	Google Cloud
Advanced Developer Professional	UiPath
Certified Master RPA Professional (A2019)	Automation Anywhere
Certified Advanced RPA Professional (A2019)	Automation Anywhere
Cambridge English: Advanced (CAE) — C1	Cambridge Assessment English
EGA (Euskal Gaitasun Agiria)	Basque Government

Certification	Organization
---------------	--------------

Education

Degree / Qualification	Institution	Year
Master's Degree in Industrial Engineering	UPV/EHU	2017
Laurea Magistrale in Ingegneria (Elettrica, Automazione, Informatica)	Università degli Studi di Cagliari	2017
Bachelor's Degree in Industrial Engineering	UPV/EHU	2015
Postgraduate Degree in International Trade	UPV/EHU	2020
Master's Degree in Teacher Training (ICT)	UNIR	2024
Bachelor's Degree in Computer Engineering (in progress)	UNED	2023 – present
